EDUCATION

- **Shanghai University of Finance and Economics** Sep. 2023 – Jun. 2027 (Expected)
B.E. in Data Science (Pilot Class of Interdisciplinary Science) Shanghai, China
 - GPA: 3.80/4.0 (Top 5%); WES-evaluated GPA: 3.90/4.0
 - **Relevant Coursework:** Advanced Operations Research (92), Stochastic Processes (94), Dynamic Programming (91), Operations Management (94), Supply Chain and Logistics (97), Econometrics (97), Causal Inference in Big Data and Economics (97.5), Machine Learning (97.5), Deep Learning (96)

PUBLICATIONS & WORKING PAPERS

* Equal contribution

- [P1] **OR-Space: A Full-Lifecycle Workspace Benchmark for Industrial Optimization Agents**
Chenyu Zhou*, Xinyun Lu*, Jiangyue Zhao*, Jianghao Lin, Dongdong Ge, Yinyu Ye (2026). Under Review. [arXiv]
- [P2] **ICU-Evolve: Evidence-Grounded Evolution of Auditable Clinical Simulators**
Chenyu Zhou*, Jiangyue Zhao*, Michael Lingzhi Li, Pengyi Shi (2026). Under Review.

RESEARCH EXPERIENCE

LLMs for Operations Research

- **OR-Space: A Full-Lifecycle Workspace Benchmark for Industrial Optimization Agents** Jan. 2026 – May 2026
Advisors: Prof. Yinyu Ye (Stanford), Prof. Dongdong Ge & Prof. Jianghao Lin (Shanghai Jiao Tong University)
 - We introduce OR-Space, the first full-lifecycle workspace benchmark for evaluating industrial optimization agents beyond one-shot problem-to-solution generation.
 - The benchmark features persistent multi-artifact workspaces integrating business requirements, structured data, code artifacts, and solver feedback to support BUILD, REVISE, and EXPLAIN tasks.
 - Large-scale evaluation of 20 state-of-the-art LLMs across 300 benchmark instances and four optimization solvers reveals systematic reliability gaps and failure modes in full-lifecycle industrial OR workflows.
- **LoopOR: A Dual-Loop Workspace Agent for Full-Lifecycle Industrial Optimization** May 2026 – Ongoing
Advisors: Prof. Dongdong Ge & Prof. Jianghao Lin (Shanghai Jiao Tong University), Prof. Zizhuo Wang (CUHKSZ)
 - We introduce a workspace-based agent system for long-horizon industrial optimization that maintains and evolves a persistent workspace across interactions, moving beyond single-shot, text-centric LLM-for-OR systems.
 - LoopOR adopts a dual-loop architecture that separates within-task execution from cross-task workspace evolution, with an OR-specific agent harness for workspace interaction, solver execution, and reusable domain skills.
- **Operations Research Language Model (ORLM) Training and Evaluation** Jun. 2026 – Ongoing
Advisors: Prof. Dongdong Ge & Prof. Jianghao Lin (Shanghai Jiao Tong University), Prof. Zizhuo Wang (CUHKSZ)
 - We develop ORLM, a domain-specific foundation model for operations research, spanning large-scale OR corpus construction, post-training of 8B and 30B models, and benchmark evaluation on optimization reasoning tasks.

AI for Healthcare

- **Interpretable AI for Sequential Healthcare Decision-Making** Jun. 2026 – Ongoing
Advisors: Prof. Pengyi Shi (Purdue), Prof. Michael Lingzhi Li (Harvard Business School)
 - In ICU-Evolve, we develop an evidence-grounded white-box simulator for sequential sepsis treatment, using LLM-guided structural proposals and residual-guided Tree-QD search to refine auditable patient dynamics against MIMIC-IV observational targets.
 - Ongoing work investigates interpretable sequential decision-making through structural analysis of MDP/POMDP models and learning-theoretic study of how simulator-generated dense feedback and pooled synthetic and observational data can improve learning from sparse clinical signals.
- **Clinical Language Model Training and Evaluation** May 2026 – Ongoing
Joint work with Ruijin Hospital, Shanghai Jiao Tong University School of Medicine
Advisors: Prof. Dongdong Ge & Prof. Jianghao Lin (Shanghai Jiao Tong University)
 - We develop and evaluate clinical language models on institutional data from Ruijin Hospital and MIMIC-IV, with a focus on supervised fine-tuning and downstream performance.

TEACHING EXPERIENCE

- **Stochastic Processes**
Teaching Assistant, Shanghai University of Finance and Economics
 - **Operations Management**
Teaching Assistant, Shanghai University of Finance and Economics

Fall 2026

Shanghai, China

Fall 2026

Shanghai, China

PROFESSIONAL EXPERIENCE

- **Cardinal Operations**
Research Intern (LLM & Optimization)
 - **Boston Consulting Group (BCG)**
Part-time Assistant

Jan. 2026 – May 2026

Shanghai, China

Jun. 2025 – Nov. 2025

Shanghai, China

HONORS & AWARDS

- **People’s Scholarship (First Prize)** – Top 2% among undergraduate students at SUFE
 - **Academic Innovation Scholarship** – Recognized for outstanding research and innovation performance
 - **Mathematical Contest in Modeling (MCM) Finalist** – Top 2% among 27,456 teams worldwide

2025
